

November 1, 2022

Dear Industry Colleague:

The 2022 North Central Extension-Industry Soil Fertility Conference will be held November 16-17 in Des Moines, Iowa. This conference is an annual event highlighting developments in soil fertility and nutrient management from the mid-west and north central United States.

The planning committee has put together an excellent program. University and industry presenters cover a range of nutrient management topics to be viewed by industry, university, extension, and government personnel. (Information and meeting program can be viewed at <https://northcentralfertility.com/>).

The conference provides multiple industry-funded student awards for a student presentation competition to encourage graduate and undergraduate student participation. These future agriculture leaders of tomorrow are encouraged to participate, broaden their agronomic knowledge and experience, and interact with university and industry scientists and practitioners. The awards are presented at the conference and recognition is given to the sponsors.

This letter is to solicitate your help in sponsoring these student awards. We appreciate the support this program has received from industry in the past and we are again asking for your help with this worthy program. Sponsorship contributors are generally in the range of \$350-700, but any amount you can contribute greatly helps these students. Donations can be made via paper check mailed to PAQ Interactive or by credit card. For billing and invoicing, contact
